

# INVESTMENT IN THE FUTURE

## VISIT FROM THE GEORG AUGUST UNIVERSITY OF GÖTTINGEN

Nicole Rehse  
*PR/Communication*

LOHMANN has always been known for training and educating its own customers in the various areas of poultry management. However, we also work closely with different universities because today's students are tomorrow's professionals and experts.

GEORG-AUGUST-UNIVERSITÄT  
GÖTTINGEN

Therefore, we were pleased to welcome a group of students from the Georg August University of Göttingen accompanied by their supervisor Dr Reza Sharifi to our headquarters in Cuxhaven.

The students belong to the “European Master of Animal Breeding and Genetics” course and regularly complete visits to breeding farms for various animal species.

**During the visit to Cuxhaven, the LOHMANN genetics team, Dr. Hakimeh Emamgholi-Begli, Björn Andersson and Dr. Matthias Schmutz gave presentations on different topics such as Genomic Breeding Value Estimation or Bone Stability.**

**In the afternoon, a visit to the hatchery of LOHMANN Germany in Dorum was scheduled to demonstrate the AAT machine for embryo sexing.**

**Dr. Hakimeh Emamgholi-Begli**  
*Statistical Geneticist*

**Dr. Matthias Schmutz**  
*Director of  
Research & Development*

**Björn Andersson**  
*Deputy Director of  
Research & Development/  
Genetics*

**We are always very pleased to welcome not only customers but also other interested people such as students. Maybe our genetics team could inspire one or the other for the dear feathered friends.**
