

LOHMANN
BREEDERS
It's the egg

RELIABLE FERTILITY PROVEN BY LOHMANN'S OWN FIELD DATA

THE LOHMANN FIELD DATA FERTILITY ANALYSIS 2026
CONFIRMS LONG-TERM PERFORMANCE

Stable fertility throughout the entire production cycle

Source: LOHMANN Field Data Fertility Analysis 2026

Early candling and hatchability comparison

	Age	Early candling (%)	Hatchability (%)
LOHMANN-LSL	36 w	4.23	94.18
	47 w	5.14	92.56
	55 w	5.93	90.54
	75 w	10.75	78.46
Competitor	46 w	12.00	82.44
	52 w	15.11	79.00
	61 w	21.77	66.00

- ✓ Clear performance decline in Competitor with increasing age.
- ✓ High persistence and stability of LOHMANN-LSL up to advanced flock age.

Stability is based on:

Uniform
embryonic
development

Reduced
fertility and
developmental
losses

High biological
robustness,
even in older
flocks

LOHMANN-LSL

Age average share in step	Fertility (%)	Early dead (%)	Medium dead (%)	Later dead (%)	Tot Hatchability (%)
24 to 32 Young	2.59	5.93	0.89	6.98	82.45
33 to 51 Prime	2.56	6.74	0.50	7.75	83.61
52 to 57 Old	2.91	6.01	0.71	8.36	82.01

COMPETITOR

Age average share in step	Fertility (%)	Early dead (%)	Medium dead (%)	Later dead (%)	Tot Hatchability (%)
24 to 32 Young	7.52	7.47	0.73	7.08	77.20
33 to 51 Prime	6.80	6.51	0.95	6.77	78.97
52 to 57 Old	2.91	6.11	0.96	11.56	71.06

Results for hatcheries:

Improved
utilisation
of existing
capacity

Higher
efficiency
per
cycle

More
predictable
economic
returns
