

LOHMANN HATCHERY COURSE 2023

LOHMANN
BREEDERS

FROM EGG TO CHICK

Nicole Rehse
PR/Communication

The merry month of May generally symbolises the awakening of nature and the emergence of new life. So it's the perfect month to organise our LOHMANN HATCHERY COURSE. Because before the chick comes the egg.

As we all know, the handling of the eggs within the hatchery is the be-all and end-all for good chick quality. As this is such an extensive area, we were once again able to fill an entire week with hatchery-related topics.

With around 20 participants, no fewer than 10 different nationalities came together. This international mix always promises a special exchange of experiences.

The mix of different countries is also a particularly interesting challenge for our experts, as it brings to light very different questions and problems that need to be answered and solved. It's a win-win situation for everyone.

For other alternatives please contact LOHMANN Marketing Team. (marketing@lohmann-breeder.com)</small></p> | |

What made this year's programme particularly special were the external speakers who accepted our invitation.

Special thanks go to Lotte Hebbink (Pas Reform), Mohamed Sobhy (Petersime), Rui Silva (Jamesway) and Prof R. Preisinger (EW Group).

We can therefore look back on a very successful week in which all important aspects within the hatchery were discussed.

At the end, we were able to present all participants with their certificates and send them back to their workplaces around the world with new insights and accentuated knowledge.
